

CV Moriz Büsing

I'm a full stack web developer with over 10 years of experience in building web applications and websites. My primary stack is React and Next.js/Remix. Since leaving N26 in 2021, I have been working on various projects from small websites to big platforms as an independent developer. In 2026, I co-founded Portal, an AI platform to generate audio guides from museum data sources.

Portal (since 2026, Co-founder & CTO)

Co-founded and architected Portal, an AI platform for museums that generates personalised tours and conversational experiences grounded in institutional collections and research. Designed the overall system architecture, AI infrastructure and frontend application, while leading product development and engineering. Responsible for technical strategy, deployment architecture and the integration of large language models, retrieval systems and museum data sources.

Focus: LLMs, Agentic Pipelines, UX

Stack: Typescript, Mastra, React Router

Independent Software Engineer (since 2021)

Worked with startups and established companies to architect and build modern web applications, focusing on frontend architecture, developer experience, performance and product quality. Led greenfield projects, modernised legacy applications, built design systems, implemented testing infrastructure and collaborated closely with product and design teams. Clients include: IKEA, IBM, Meta, Erste Bank.

Focus: Architecture, UX, Performance, Testing

Stack: TypeScript, React, Next.js, Tailwind CSS, Redux, Firebase, Cypress, Capacitor

N26 (2020–2021, Senior Web Engineer)

Worked on the React-based web app for german fintech unicorn N26 in a team of 20 Web Engineers. Mentored junior engineers, architected and released features, improved the release and testing processes and helped build the design system.

Focus: Accessibility, Testing, Reliability, Security

Stack: React, GraphQL, Apollo, Fela, Cypress, Jest, Jenkins

wild (2016–2019, Technical Director)

Started out as a developer, later lead the tech team of 6 engineers to realize web based projects for clients such as Google, Spotify, Samsung, Red Bull. Hired and mentored engineers, planned and executed projects from cutting edge microsites to platforms with heavy traffic. Developed one of the first sites using the WebVR API, used WebGL and the Web Audio API extensively in many projects.

Focus: Animation, Performance, Experimental technologies

Stack: React, Next, Styled JSX, SASS, AWS, Three.js, Tone.js

identum (2015–2016, Web developer)

Built many websites, mostly based on Drupal. Later led development on a website for an Austrian Ministry, conformant with WCAG AAA guidelines.

Focus: Accessibility, CMS, Usability

Stack: Drupal, JavaScript, Gulp, PHP

Based in Vienna, Austria

Education

University of Vienna (2012–2015)

Computer Science with media focus
(Medieninformatik)

Freie Universität Berlin (2011–2012)

Computer Science

Other Skills

- AI Tooling
- Supabase
- Astro
- API Design
- Relational Databases
- Command Line / UNIX
- Github Actions
- AWS
- Various CMS'es
- Music Production
- Adobe Creative Suite

Other Interests

Music, Chess, Cycling, Food, Travelling
